| 2021 | <b>Village of Silverton</b>                        | Compost bins for residents.                                                                                                                                                                                                                                                                   |
| 2021 | <b>Corporation for Findlay Market</b>              | Equipment, materials, and site improvements for residential food scrap drop-off.                                                                                                                                                                                                              |
| 2021 | <b>Hammond North</b>                               | Materials and contractors to create a reuse and recycling room for residents.                                                                                                                                                                                                                 |
| 2022 | <b>Church on Fire Ministries</b>                   | Transport and install a donated walk-in refrigerator and freezer to store rescued surplus food that will be distributed through the organization’s food pantry.                                                                                                                               |
| 2022 | <b>Madtree Brewing</b>                             | Bailer for woven polypropylene bags to facilitate recycling.                                                                                                                                                                                                                                  |
| 2022 | <b>Bethany School</b>                              | Cafeteria waste sorting station; bulk milk, cereal, and condiment dispensers; reusable tableware and magnetic garbage can lids to keep silverware from accidentally being thrown away.                                                                                                        |
| 2022 | <b>La Soupe</b>                                    | Ice machine to quickly stop cooking process, quick-chill, sometimes dilute stocks and soup; and to fill coolers for local distribution of upcycled food at Harvest Food Market. Water-bottle refill station to replace reliance on plastic water bottles for staff, volunteers, and visitors. |
| 2022 | <b>Valley Interfaith Community Resource Center</b> | Construction costs to expand choice food pantry, food sorting, and food storage areas to accommodate more food distribution and reduce food waste from spoilage.                                                                                                                              |
| 2022 | <b>Gorman Heritage Farm</b>                        | Water bottle refill station; waste sorting station equipment; and a compost bin, educational signage, pergola, and benches for a compost education site.                                                                                                                                      |
| 2022 | <b>Junk King</b>                                   | Purchase and install polystyrene densifier; employee certification and advertising to recycle polystyrene.                                                                                                                                                                                    |
| 2022 | <b>MyWhy</b>                                       | Convert a trailer into a mobile produce market to allow low-income students and family members to shop for produce just outside their school. Produce will be purchased from farmer’s market vendors at the end of the day.                                                                   |
| 2023 | <b>The City of Wyoming</b>                         | Food scrap collection buckets, compost collection services, shelter, educational materials, and advertising for community compost drop-off site.                                                                                                                                              |

|             |                            |                                                                                                                                                                                                                                                                                                                                  |
|-------------|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>2023</b> | <b>Civic Garden Center</b> | Earth Cube and Johnson-Su Bioreactor composting units, food scrap collection bins, staff and volunteer training, and educational materials to compost community and Morrison Healthcare food scraps. Funds will also be used to purchase a refrigerator to preserve unwanted donated produce from Our Harvest customers' shares. |
| <b>2023</b> | <b>City of Reading</b>     | Public recycling bins and service for business district and parks.                                                                                                                                                                                                                                                               |
